

School Resource Kit

Information for School Nurse

Greetings! We know how busy you are and want to thank you for taking the time to help your students develop healthy eating and physical activity habits. Here you will find a host of fun-filled activities to follow up the FOODPLAY program. You will find a sheet with the FOODPLAY Pledge of Allegiance and snack cards that can be reproduced and distributed to children as a fun handout. Additional activities in this section and in the Teachers' Section can be used throughout the year to help integrate nutrition and health into core curriculum areas and meet state and national standards. We hope these activities will provide fun ways for everyone at your school to work together to create a healthy learning environment and effective school wellness policies.

Please visit us at www.foodplay.com for more fun-filled nutrition activities, resources, and programs! We look forward to coming back to your school again soon!

 **FOODPLAY Pledge & Snack Recipe Cards**

 **How to Build a Healthy School Environment**

FOODPLAY

The Pledge of Allegiance

I pledge allegiance to my body for all it does for me, and to the community of which I am a part, one planet, under the sun, interconnected, with health and happiness for all.

I will try to:

- Eat more fruits and vegetables every day.
- Fuel up on a wide variety of GO foods!
- Read It Before I Eat It!
- Eat breakfast every day.
- Enjoy being active.
- Feed healthy messages to my mind.
- Make choices that are good for my health and for the health of the planet.

J.J.

Coach

Date

Top 10 Tips to Treat Your Body Right!

1. Fuel up with breakfast every day!
2. Fruits & Veggies - more, more, more!
3. Balance your diet with MyPlate!
4. Cut down on sugar and fat!
5. Read it before you eat it!
6. Go fresh! Choose foods that are good for your health and good for the health of the planet!
7. Get enough sleep and relaxation!
8. Have fun being active every day!
9. Feed healthy food to your body and positive messages to your mind - "I can do this!"
10. Remember, every body is different, and different is a good thing! Feel good about YOU!

SODA NATURALE

INGREDIENTS:

- Seltzer Water
- Any 100% Fruit Juice: Orange, grape, cranberry, etc.

WHAT TO DO:

1. Mix together half seltzer and half juice in a cup.
2. Name your soda and make up a cool label. Paste it on a recycled bottle and package your drink!

(There are 10 teaspoons of sugar in a can of soda!
For a tasty but healthy drink, make your own soda...naturally!)

YOGURT PARFAIT

INGREDIENTS:

- Yogurt or soy yogurt
- Cut up fruit (like strawberries, bananas, peaches, apples)
- Topping (cereal, granola, nuts, seeds)

WHAT TO DO:

1. Put a layer of yogurt in the bottom of a cup, then add a layer of fruit, then another layer of yogurt, then another layer of fruit, and a last layer of yogurt.
2. Finish off with your favorite topping.

How to Build a Healthy School Environment!

We, at FoodPlay Productions, have had the opportunity to visit thousands of schools each year bringing our live nutrition theater shows and fun-filled resources to enthusiastic audiences. We've learned a great deal in the process, and have seen wonderful examples of whole school communities—students, parents, teachers, food service, nurses, and administrators—working together to create a healthy school environment and an innovative and effective wellness policy.

We hope this primer will be of help to you. We've listed 30 fun, low-budget ideas schools can use to create happy and healthy places in which to learn. It does take a healthy village to raise a healthy child, and we look forward to working with you. Thanks for your dedicated efforts!

—Barbara Storper, MS, RD

Think Outside the Lunchbox!

FoodPlay's Top 30 Fun Ways to Create a Healthy School Environment!

1. At the beginning of the year, create a fun way to introduce your school food service staff to students and teachers in order to give staff proud ownership of the meals they turn out and to encourage a positive relationship between all groups. Little things mean a lot—holding a special “silly hat day” or “holiday theme” in which food service staff can shine, can do a lot in creating a successful school year.
2. Take a survey or set up student groups of “Taste Testers!” to determine what students like to eat. Encourage weekly or monthly “taste tests” where students can rate different meal options or try new foods. Incorporating their favorites increases participation in breakfast and lunch programs
3. Excite teachers about nutrition and health by providing information that is of special concern to them. Keep an up-to-date bulletin board in the teachers’ room and post articles about nutrition discoveries and innovative actions other schools have tried. The more teachers find the articles relevant to their needs, the more motivated they’ll be to include them in their lesson plans.
4. Advertise menus in advance, highlighting weekly health specials. Or, create a healthy food labeling system to make it easier to recognize the best available options—perfect for a class project!
5. Try new innovative fundraising activities instead of candy sales, such as talent shows, family bingo night, auctions, tag sales, or healthy bake sales. Other options include selling class cookbooks, flowers, and calendars.
6. Provide “grab n’ go” breakfasts or a breakfast cart filled with healthy favorites such as yogurt, granola, and fresh fruit. On test days, offer special breakfasts and lunches (with financial support from the school or PTO funds!).

7. Turn the cafeteria into a learning laboratory! Display posters you collect or encourage the art teacher to have students paint posters promoting healthy foods and fun physical activities that you can hang as a special "Student Art Gallery" throughout your lunchroom.
8. Celebrate diversity by serving up healthy ethnic meals from the variety of cultures represented by your student body. Put a map of the world on your cafeteria wall. Work together with social studies and language teachers to inspire students to learn where foods come from.
9. Fill vending machines with healthy foods such as water, 100% fruit and vegetable juices, low-fat milk, popcorn, pretzels, baked chips, fresh and dried fruit, yogurt, trail mix, low-fat crackers and cookies such as fig bars, gingersnaps, or graham crackers. Have students get involved.
10. Invite students, teachers, and parents to help plan the menus for school lunches, and, with community support, try to incorporate locally grown produce from nearby farms, if possible.
11. Use holidays to promote and celebrate healthy foods from different cultures. Invite parents to conduct food demonstrations with classes, sharing some family favorites. Or, invite parents to create a multi-cultural pot luck feast and talent show as a special event or fundraiser.
12. Teach students about healthy foods in the classroom before introducing them to kids in the lunchroom. Studies show that students who learn about foods in class, eat from two to nine times as many of the new healthy foods as schoolmates who do not learn about them first.
13. Encourage classes to visit the MyPlate website, ChooseMyPlate.gov, where students can analyze their diets, discover their nutrient needs and make healthy changes.
14. Create a fun nutrition resource cart or display filled with videos, DVDs, curricula, magazine articles, and books from which parents, teachers, and students can borrow recommended resources.
15. If there is a convenience store nearby where students buy snacks after school, have teachers incorporate a lesson to educate students about which snacks would be healthiest. Create a "Make a Snack Counter-Attack Game" where kids are asked to select the top ten healthiest snacks for less than one dollar each. Encourage them to write letters to the store managers to request that more healthy snacks are sold.
16. If possible, take a field trip to a local farm or farmers' market to teach students where food comes from. You may even be able to offer a weekly farmers' market at your school that teachers, kids, and parents can buy fresh produce from!
17. Start a school garden (or window sill garden!) and involve students in all aspects. Vegetables planted can then be served at mealtime. Work together with teachers to foster in class lessons about gardening and nutrition.
18. Make the teachers' and nurse's rooms healthy, stress-free environments—with water that is drinkable, working refrigerators, healthy snack machines, hot water machines, and space to enjoy a healthy lunch or time-out period. PTO members may be interested in setting helping create these.
19. Encourage teachers to praise students' successes verbally or with fun rewards, such as stickers, extra recesses, walks, or parties instead of with sweets or candy.

(continued)

And Now, Promoting Physical Activity:

20. Enlist the help of the principal to be your school's health leader. See if she/he will hold special lunches where kids can eat at his/her table and ask questions. Or, he/she can lead regular walks outside with classes. Or, make announcements over the loudspeaker offering inspiring healthy quotations or promoting "take-an-active-break" throughout the week.
21. Create "walking buses" or biking clubs where students can walk or bike to school together instead of taking the bus.
22. Develop interesting walking maps that classes can use to take interesting walks around the school or neighborhood while learning how to follow maps. Or create a fitness track around the school for students to use before and after school.
23. Provide students and teachers with ideas, materials, and classes to help reduce stress including yoga, meditation, tai chi, activity breaks, and reading time.
24. Invite the art teacher to lead students in mural making, where students' favorite physical activities are painted along hallways, in stairwells, or in the gym.
25. Encourage students to meet together and come up with their own ideas for cool after-school activities. Favorites include: hip-hop or swing dancing, martial arts, juggling, yoga, or cooking.
26. Incorporate physical activity into school fundraising activities such as walk-a-thons, car washes, dance contests, or competitive sports games.
27. Encourage teachers to start class or take breaks with stretching or jumping jacks to help reduce stress and energize students.
28. Sponsor a "Health and Fitness Day", during which students can learn about the benefits of a healthy lifestyle and have the opportunity to try new activities and healthy snacks.
29. Encourage students, teachers, and parents to participate in school-wide sports events, emphasizing the benefits of school pride, teamwork, and physical activity.
30. Last, but not least, trigger school-wide excitement and get everyone on board to create a healthy school environment by bringing innovative programs to your school. At FoodPlay Productions, we offer Emmy Award-winning nutrition education theater shows featuring amazing feats of juggling, colorful characters, music, magic, and audience participation to turn kids on to healthy habits. According to USDA, sponsored evaluations show FoodPlay's shows dramatically improve students' eating and exercise habits! And, FoodPlay's research-based programs come complete with comprehensive, standards-based nutrition education materials for everyone involved—students, teachers, parents, food service, and health staff—to help schools integrate nutrition education into core curricula and keep the health messages alive all year long!

School Wellness Checklist

In the cafeteria...

- ___ Are lunch schedules set at reasonable times? Some schools find that recess periods before lunch help students quiet down during lunch and reduce plate waste.
- ___ Does your cafeteria serve wholesome, nutritious meals and fresh fruits and vegetables in an attractive way?
- ___ Are there choices available in the form of salad bars, baked potato bars, pasta bars, deli bars, fresh fruit bars, or yogurt parfait stations allowing students more freedom in what they select?
- ___ Do students have adequate time to buy and eat their breakfasts and lunches?
- ___ Are lunchroom monitors present to help keep the noise level down, but not so rigid that students can't enjoy eating?

In the classroom...

- ___ Do students receive regular health and nutrition classes?
- ___ Are nutrition education efforts in the classroom tied to the foods being served in the cafeteria?
- ___ Do teachers celebrate with healthy foods as well as sweets for class parties and holidays?
- ___ Are any physical activities incorporated into the classroom to increase concentration and mental alertness—such as stretching, jumping jacks, juggling, yoga, tai chi, or karate?
- ___ Are the nurse, food service staff, or health educator available to help with nutrition education in the classroom?
- ___ Does your school have up-to-date nutrition and health videos, curricula, and references available?

At recess and break time...

- ___ Do students have the opportunity to participate in active games or have ways to be physically active during recess such as walking, jogging, running, jumping, skipping, dancing, or stretching?
- ___ Are there walking trails around the school that classes can use for an exercise break?

In the hallways...

- ___ Do the water fountains work and are they accessible?
- ___ Are the vending machines in the hallways and teachers lounge stocked with healthy choices?
- ___ Are hallways, cafeteria, gym, and classrooms free of advertisements and posters promoting candy, soda, and fast food?
- ___ Are teachers and staff practicing what they preach with healthy eating and exercise habits?

(continued)

In the gym...

- ___ Do all children have regularly scheduled gym classes?
- ___ Do gym classes offer a wide variety of activities including cooperative learning games and activities that work for students of different temperaments?
- ___ Are there posters or artwork in the gym celebrating students of all shapes and sizes being physically active?

In before-school and after-school programs...

- ___ Do special programs exist to encourage students to walk or ride bikes to and from school?
- ___ Does the school have a variety of sports teams, such as basketball, soccer, or field hockey, for students to join?
- ___ Is there well-maintained equipment available for students to use before and after school, such as basketballs, soccer balls, or jump ropes?
- ___ Are there free exercise classes, such as Pilates, acrobatics, or weightlifting available for students to participate in?
- ___ Is there transportation available, such as a late bus, for students who wish to participate in after-school programs?
- ___ Are school facilities available for after-school programs and on weekends for recreational use by the community?

In other areas throughout the school...

- ___ Are healthy and tasty food choices served at conferences and parent and staff meetings?
- ___ Do concession stands at school sports events serve healthy foods?
- ___ Does the PTO or PTA raise funds by selling something other than candy?
- ___ If there are bake sales, is there an effort made to promote the use of whole grains, fruits, and lower fat/sugar recipes? If so, can the recipes for the foods be distributed as well?
- ___ If it is essential that students are weighed and measured, can they be screened with utmost sensitivity, and not in front of one another, and with the understanding that "every body is different and different is a good thing!"
- ___ If student weights are sent home to parents, are there materials offering healthy nutrition and activity tips provided as well?
- ___ Does the school sponsor multi-cultural days or health fairs so that foods from different cultures and healthy activities can be celebrated?
